

REMARKS/ARGUMENTS

In the Preliminary Amendment filed in connection with the above-identified patent application, the language "continuous and integrally formed" deleted from claims 1 and 18 was not properly presented. That is, as noted in the remarks presented in the Preliminary Amendment, claims 1 and 18 have been amended to delete the language concerning the frame portion being continuous and integrally formed as no patentable weight was given to this language. However, in presenting the claims in the preliminary amendment, the language was inadvertently deleted and not shown by strike-through. This supplemental preliminary amendment is presented to correct that oversight. In addition, the dependency of claim 4 has been changed based on the previous cancellation of claim 3.

Based on the amendments to the claims, the above remarks and the agreements previously reached with the Examiner, the Applicant respectfully submits that the present invention is patentably defined over the prior art of record, and requests allowance of the claims and passage of the application to issue. If the Examiner should have any additional questions or concerns regarding this matter, he is cordially invited to contact the undersigned at the number provided below in order to further the prosecution.

Respectfully submitted,

Everett G. Diederiks, Jr.
Attorney for Applicant
